

## We'll Get Your Business on the Web Before your Name's on the Truck

Let us help you bring in more customers with an  
easy to remember web address for your company vehicle.

### HERE'S HOW IT WORKS!

#### DAY 1

Tell us what you want to say and what your site should look like. We make it easy for you with our "New Customer" Tools.

#### DAY 2

While we work on your site, we'll register the new web address that you choose. We'll even help you find one if you'd like.

Unlike other places, we'll register the web address in your name. You own the site... you own the name!

#### DAY 3

That's it! At the end of the day you're new site is done and ready for approval. Tweak it here and there, add some email addresses for your employees, and we're ready to post it to the internet. It really is that simple!

You've put a lot of work into your business. Now take the next step with a quality web site. You'll give new customers a way to find you online while keeping your existing customers informed about your products and services.

3DaySites.com can help you get it done fast and cheap. You tell us what you want to say, and we'll do the rest... it's just that easy! And our technicians will keep you informed throughout the process, so you're never left wondering what's going on with the construction.

If you already have a website, we can give it a tune-up for about the cost of rotating your tires. Click on a package below to learn how to get started. No obligations. No hassles.
